

- 1 Draw the deck surface in inches.
- 2 Identify areas with privacy screens, glass inserts and stair railings.
- 3 Place posts in the corner and at the top of the stair railings.
- 4 Calculate the length of the sections required between the posts, based on the available sections. If necessary, add posts or cut sections.

Fictitious deck of 144" x 144"

*Remove 2" at each end for anchoring posts

Avoid losses by using scrap of another cut section, as in our simulation.

WARNING!

In this case, you will need an additional notches kit.
