

Wood or Composite Deck

- Deck attached to a wall : Measure from the wood framing to the house wall.
- Freestanding or multi-level deck : Measure the wood framing.
In both cases, do not include the overhang of the finish board in your measurements.

Patio or concrete slab

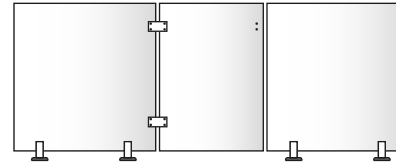

Measure the total dimension.

Measurement checklist for spigot railing installation.

Pool gate

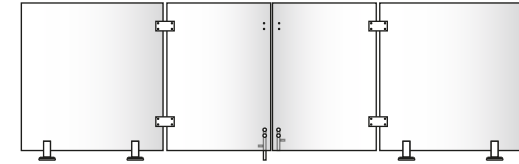

If needed, indicate on your plan where you want to install a single or double door, and the direction in which you want it to open."

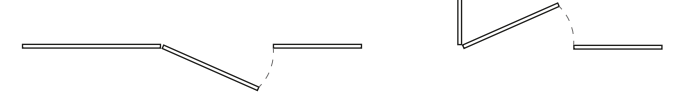

Single

Reversed opening (toward the pool)

Double

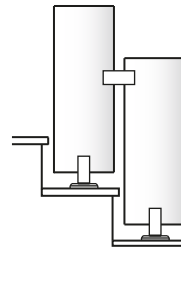

Standard (toward the house)

Corner/Wall

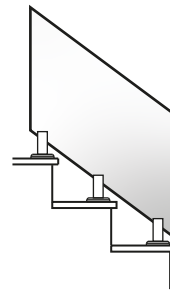

Stairs

Refer to the drawings below to gather the necessary information according to the type of railing you want:

Individual Panels

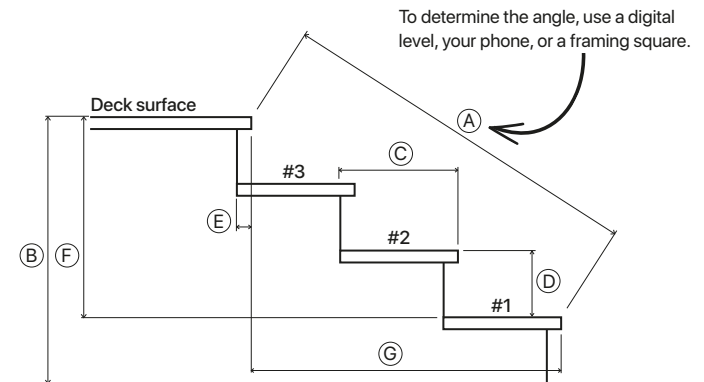

Custom Panels

Additional production time.

- A Stair angle
- B Deck height
- C Tread depth
- D Riser height
- E Nosing dimension
- F Height of the top of the patio above the first step
- G Edge-to-edge dimension
- ➔ Total number of steps

Measurements must be taken on finished steps. In the case of a custom panel, it is important that each step has the same dimensions in order to achieve the correct angle.

Before starting your project, please refer to our website for installation instructions. Make sure you comply with your local building codes and regulations.

Your turn !

Draw your structure with the exact dimensions :

→ Customer name : _____

Store name : _____

Store contact person : _____

Measurement date : _____

→ Type of deck

Wood/composite

Concrete

Pavers

Stairs

All this information is required to calculate the staircase.

Do you need 1 or 2 railings for your staircase :

1 2

→ Make your list :

Desired height

36"

42"

48"

60"

Individual panels

(C) Tread depth

(D) Riser height

(E) Nosing dimension

Total number of steps

Hardware color

Stainless steel

Black

Custom panels

(A) Stair angle

(B) Deck height

(C) Tread depth

(D) Riser height

(E) Nosing dimension

Total number of steps

Pool gate

Type of gate

Single

Double

Floor latch
Panel KS-BA10D-48X300-CL

Hinges

Standard

Wall mounting

Panel height

Handrail

Latch (with key)

Standard opening
Toward the house

Reversed opening*
Toward the pool

Corner/wall

WARNING ! If you have more than one staircase, take the measurements of each one.

! Make sure to comply with your municipality's regulations as well as the Building Code, especially for balconies located more than 1.83 m above the ground.

→ To indicate on your plan :

- Location of the pool
- Location of the pool gate and swing direction (right or left / standard or reversed)
- If your deck is attached to a house, indicate the house wall on your plan
- If you have multiple glass panel heights, use a color code in your sketch

*WARNING! This option is not allowed in all municipalities.
